

Photograph WO5: A photograph of the site conditions of the West Orange Bear Brook Tributary taken on May 4, 2021. This photograph shows the conditions of the end stream segment (upper bounds) of the right fork.

Photograph WO6: A photograph of the site conditions of the West Orange Bear Brook Tributary taken on May 4, 2021. This photograph shows the end segment (upper bounds of the left fork) of the survey area which was a cement culvert.

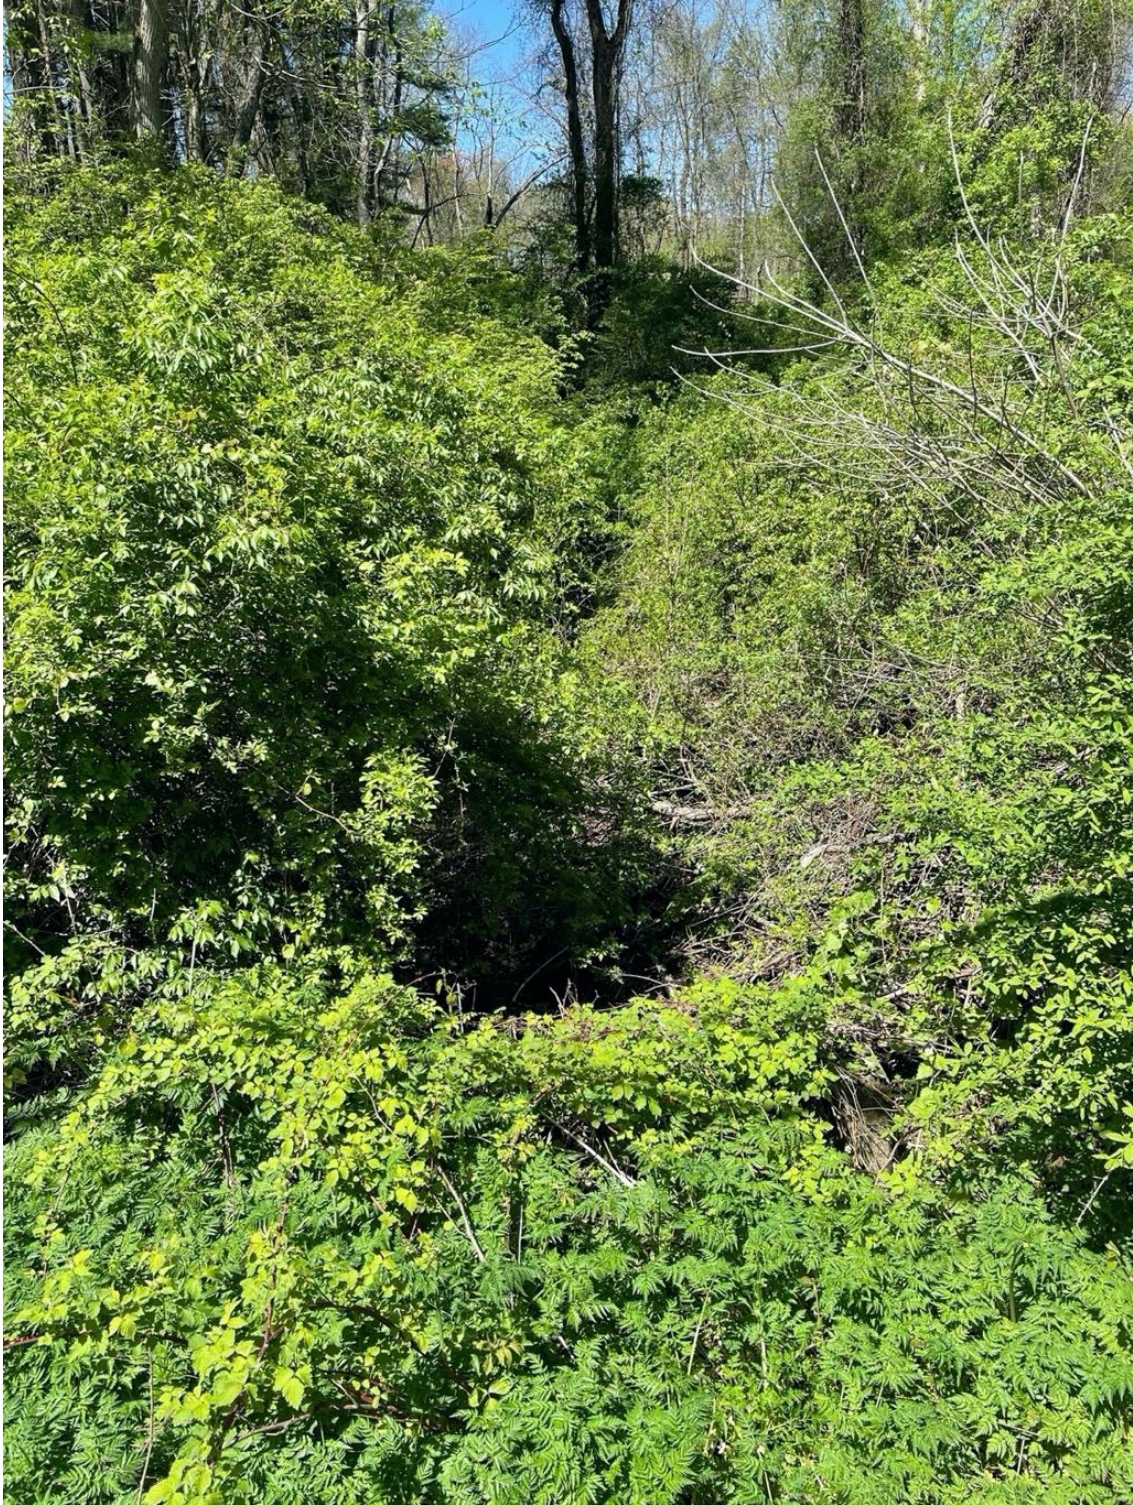

Photograph WO7: A photograph of the site conditions of the West Orange Bear Brook Tributary taken on May 4, 2021. This photograph shows the conditions of the end survey area (upper bounds of left fork).

*Hackettstown Armory Musconetcong River Tributary*

Photograph HK1: A photograph of the site conditions of the Hackettstown Armory Musconetcong River Tributary taken on May 6, 2021. This is a photograph of the dense vegetation at the beginning stream segment (lower bounds).

Photograph HK2: A photograph of the site conditions of the Hackettstown Armory Musconetcong River Tributary taken on May 6, 2021. This is a photograph of a swamp area in the middle portion of the stream segment that was different from most of the survey area. It had shallow, stagnant water that had some small vegetation and banks that could be potential basking areas for GLIN.

Photograph HK3: A photograph of the site conditions of the Hackettstown Armory Musconetcong River Tributary taken on May 6, 2021. This photograph is a middle portion of the stream segment that was representative of the majority of the GLIN survey area.

Photograph HK4: A photograph of the site conditions of the Hackettstown Armory Musconetcong River Tributary taken on May 6, 2021. This photograph was a middle area of the stream.

Photograph HK5: A photograph of the site conditions of the Hackettstown Armory Musconetcong River Tributary taken on May 6, 2021. This photograph shows the end stream conditions (upper bounds).

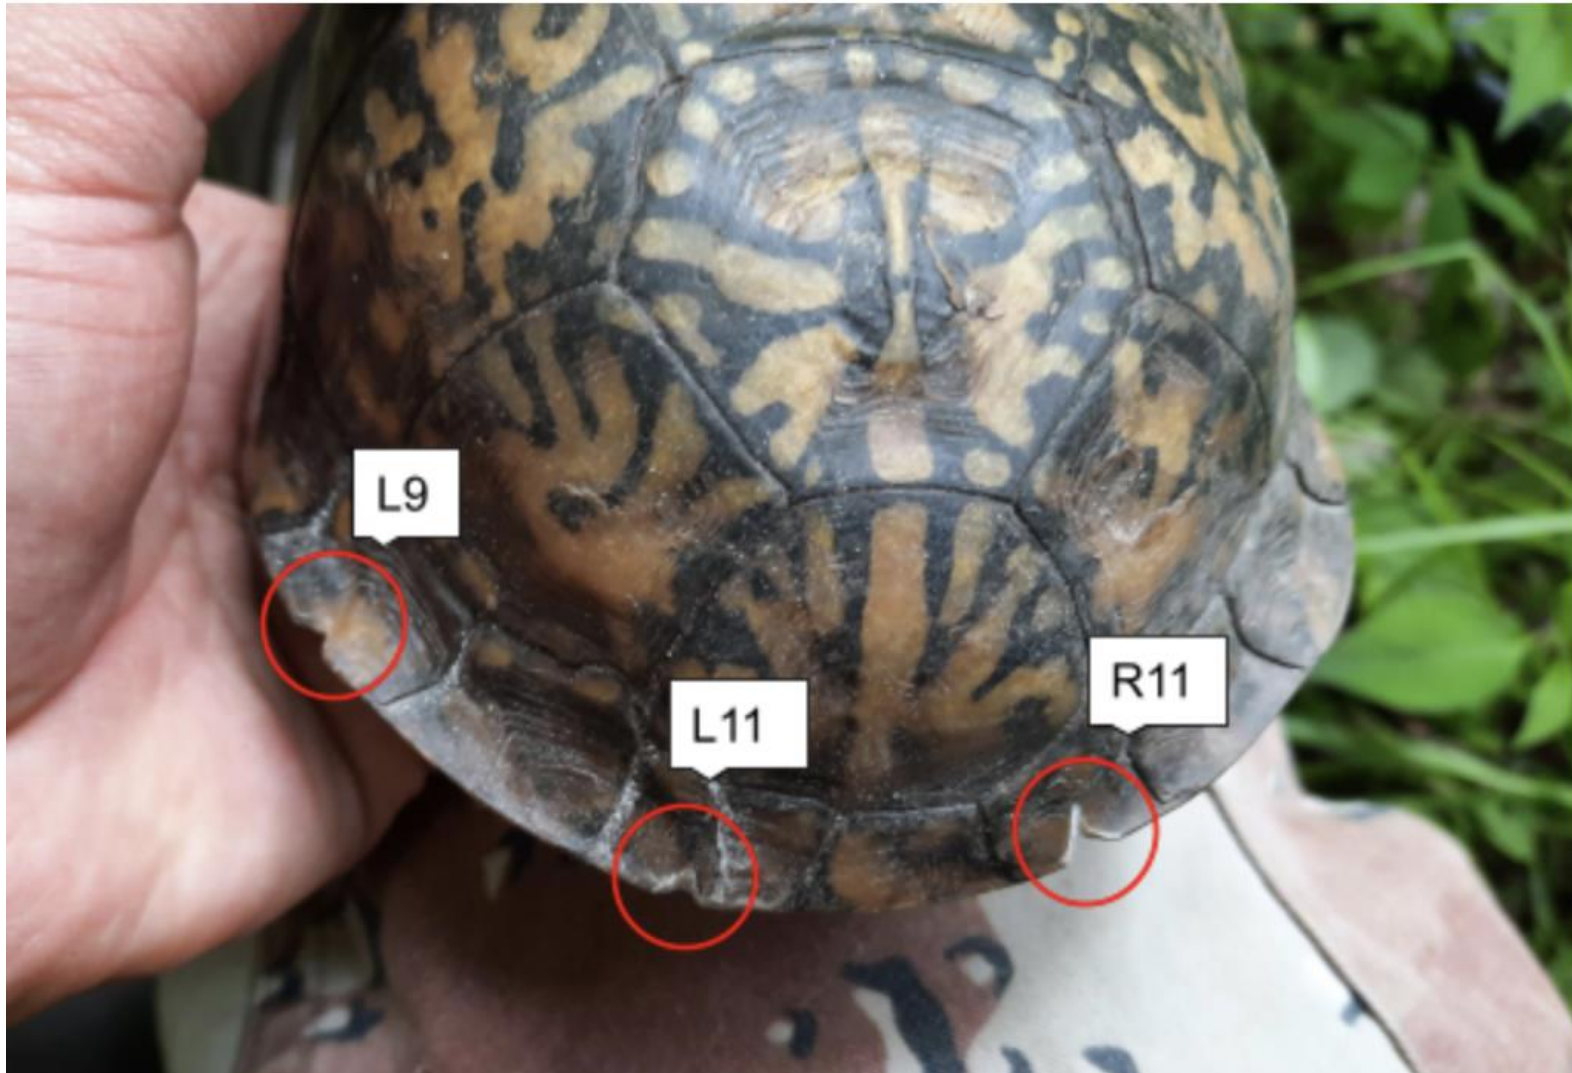

Photograph HK6: A photograph of the site conditions of the Hackettstown Armory Musconetcong River Tributary taken on May 6, 2021. This photograph is an image of the end of the stream segment (upper bounds) that was surveyed.

*Eastern Box Turtle*

Photograph BT1: A photograph of the notch placement of the box turtle at the Lawrenceville NJDMAVA HQ on May 11, 2021. This box turtle was notched as 2900 (L9, L11, R11).
